

ASHAN ODITHYA

B.SC. ENG. (HONS) IN COMPUTER ENGINEERING

Colombo, Sri Lanka | +94 77 0555 626 | ashanuni25@gmail.com | [LinkedIn](#)

SUMMARY

Computer Engineering graduate with hands-on production experience building full-stack TypeScript applications on AWS. Experienced across the stack, from REST API design and serverless backends to React frontends, with a proven track record of delivering clean, tested, and well-documented code in an agile team. Fast learner who takes ownership, asks questions early, and communicates effectively through PRs, standups, and code reviews.

PROFESSIONAL EXPERIENCE

Nov 2025- Present

Software Engineer Intern — WealthOS (a JPMorgan Company)

Contributed to the development and production support of cloud-native enterprise applications, delivering scalable serverless solutions and maintaining production systems through Agile sprint delivery.

Product Development — Wellness Allowance Platform

- Built and deployed a serverless Wellness Allowance platform supporting the end-to-end claim lifecycle from employee submission through HR/Finance approval and payment processing.
- Engineered type-safe React and TypeScript features and AWS Lambda services, including centralized error handling and scalable application workflows.
- Designed RESTful APIs with AWS Lambda, API Gateway, and DynamoDB, documenting API contracts using OpenAPI/Swagger for maintainable integration.
- Implemented authentication and role-based access control across 3 user roles using Amazon Cognito, JWT, and OpenID Connect (OIDC).
- Secured supporting-document uploads using Amazon S3 presigned URLs and developed reporting APIs for claim status, spending, and budget utilization.
- Automated deployments through CI/CD pipelines and provisioned cloud infrastructure with Terraform across development and production environments.
- Collaborated in Agile sprints through planning, stand-ups, code reviews, testing, production support, and technical documentation.

Production Engineering & Agile Delivery

- Investigated and resolved production defects and incidents across enterprise applications, improving system stability and service continuity.
- Conducted root cause analysis with senior engineers, QA, and Product Owners to deliver targeted fixes and preventive improvements.
- Delivered production fixes, feature enhancements, and validation improvements while assessing regression risk and preserving existing functionality.
- Performed unit, integration, and functional testing, supporting QA validation, peer review, and deployment readiness.
- Managed source control using Git and Bitbucket, following pull-request workflows and incorporating peer-review feedback.
- Supported CI/CD deployments and production releases, investigated post-deployment issues, and maintained technical documentation.
- Tech Stack: [TypeScript](#), [React](#), [AWS Lambda](#), [API Gateway](#), [DynamoDB](#), [S3](#), [Cognito](#), [REST APIs](#)

NOTABLE PROJECTS & RESEARCH

E-Commerce Platform - Personal Project

Jul 2025 - Jul 2025

- Developed a full-stack e-commerce application using the MERN stack, featuring product browsing, shopping cart, wishlist, user registration, authentication, order management, reviews, and responsive user interfaces.
- Built RESTful APIs with Node.js, Express, MongoDB, and Mongoose for product, user, order, payment, review, and contact-management workflows.
- Implemented JWT-based authentication and role-based authorization, protecting customer order actions and restricting product and order-management functions to administrators.
- Added secure API practices including CORS configuration, request validation through Mongoose schemas, centralized error handling, and safe HTTP error responses.
- Integrated Supabase Storage for product-image uploads and management; developed React UI with React Router, Context API, Tailwind CSS, and Axios.
- Tech Stack: [MongoDB](#), [Express.js](#), [React](#), [Node.js](#), [JavaScript](#), [Mongoose](#), [JWT](#), [REST APIs](#), [Supabase Storage](#), [Tailwind CSS](#), [React Router](#), [Context API](#), [Git](#)

QoS-Aware Distributed Query Processing System

Research

- Developed a distributed SQL query optimization framework using Apache Calcite, PostgreSQL, and LinUCB, enabling join-based query decomposition and QoS-aware strategy selection.
- Implemented adaptive cut-point selection using data locality, transfer cost, planner statistics, and execution feedback.
- Evaluated using TPC-H, demonstrating improved execution performance over static QoS-based optimization.

EDUCATION

BSc. Engineering (Hons.) In Computer Engineering - University of Jaffna

Apr 2022 - Aug 2026

- Relevant coursework: Software Engineering , Database Management Systems , Data Structures & Algorithms , Operating Systems , Computer Networks & Security , Artificial Intelligence , Machine Learning , Deep Learning

AWARDS/ACTIVITIES

Participated in coding competitions and hackathons such as

- **UOJ Coders 4.0:** Finalist, Sri Lanka Rank : 12, Team name : Code_Mazer
- **MoraXtreme 9.0:** Sri Lanka Rank: 82, Team ViperBytes

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, C++

Frontend: React, HTML5, CSS3, Tailwind CSS, Ant Design, Redux Toolkit

Backend & APIs: Node.js, Express.js, REST APIs, JWT, OpenAPI/Swagger

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, SQL, NoSQL

Cloud & AWS: AWS Lambda, API Gateway, S3, Cognito, CloudWatch, VPC, Route 53

DevOps & Testing: Terraform, Docker, CI/CD, GitHub Actions, Playwright

Development Practices: Git, Bitbucket, Git Branching, Pull Requests, Agile/Scrum, Jira

REFEREES

Chinthaka Jayarathna

Tech Lead - WealthOS - chinthaka@wealthos.cloud - +94 718861722

Dr. J. Jarachanthan

Senior Lecturer, Dept. of Computer Engineering, University of Jaffna. jananie@eng.jfn.ac.lk
